Future Phase Timeline	✓	✓	✓
Future phase estimate	✓	✓	✓
Solution vision document	✓	✓	✓
Client alignment meetings	✓	✓	✓
Recommendation presentation deck and meeting	✓	✓	✓

PATH TO SUCCESS SOLUTION ADD-ONS

Pick and choose from our add ons to further extend and customize your Path to Success solution

Business process mapping

User stories

Detailed integration design

Whether your organization is considering implementing Salesforce, or would like to improve the way you currently think about and use Salesforce, the Path to Success process may be for you.

By taking a people-and-process-first approach, Redpath will work with your organization to:

- Gain an understanding of your current business processes and technology landscape through discovery sessions and system audits, hearing from team members at all levels*
- Undergo a gap analysis to create a plan for reaching your future state goals based on your current state realities*
- Deliver a findings and recommendations presentation, along with a plan for implementation, that allows you to plan for implementation, confidently.*

MEET READING ACROSS AMERICA

Reading Across America (RAA) is a fictional nonprofit organization based off of past Redpath clients and experiences. RAA is located in Denver, CO, and their goal is to address disparities in reading skills among elementary school children growing up in low-income areas

by partnering with schools, families, and other community organizations. They raise money via individual donations, as well as through subscriptions to an online reading tool they created.

Their small but mighty team is not only focused on fundraising, but also creating business and school partnerships, implementing their reading software, and supporting existing users with technical and account questions.

Managing complex work with multiple systems

RAA had been using a custom-built, homegrown CRM tool to track all of their constituent information, from donors to tool subscribers to potential partners. They also used over 10 other technology tools in their day-to-day work, including a customer service platform, accounting software, email marketing tool, and more.

Most of these tools were not integrated with the CRM or connected to one another in any way, which led to a number of pain points, including:

- An incomplete understanding of their organization’s operations and impact
- A lack of transparency about constituent touchpoints and engagement
- Overspending on duplicative software
- Missed opportunities for growing partnerships
- And more

Finding the path forward

After listening to the needs of the Building Youth team, Redpath and RAA aligned on a plan to utilize Redpath’s Scarlet Path to Success offering. In addition, some of the a la carte customizations addressed needs they were looking for, such as a detailed integration design so that their team had a plan for getting all of the information they needed in one cloud based, mobile friendly, and intuitive system: Salesforce.

EXAMPLE ROADMAP RECOMMENDATION

1. Salesforce Migration

- Migrate all contacts, accounts and opportunities from homegrown CRM onto Salesforce
- Fully move customer support process in Salesforce (and retire Zendesk)
- Manual Quickbooks connection (export/import)

2. Quickbooks Integration

- Integrate Quickbooks and Salesforce to allow for automatic data sharing

3. Marketing Automation Tool Implementation

- Replace Mailchimp and Syncapps with Marketing Cloud Account Engagement (Salesforce marketing automation tool) for use across the organization

Increased efficiency and reduced cost

RAA completed Phase 1 of the Path to Success roadmap: migrating to Salesforce from their custom-built CRM. Partnering with Redpath, RAA migrated all relevant data into Salesforce, built new automated processes (including a significant overhaul of their customer support process), created new reports and dashboards, and trained staff on how to utilize the new system.

Six months later, RAA has been able to significantly reduce cost through streamlining their technology tools. In particular, RAA was able to completely eliminate the use of their previous customer support tool and instead utilize standard Salesforce functionality to meet their customer support needs in a more cost-effective, efficient way.

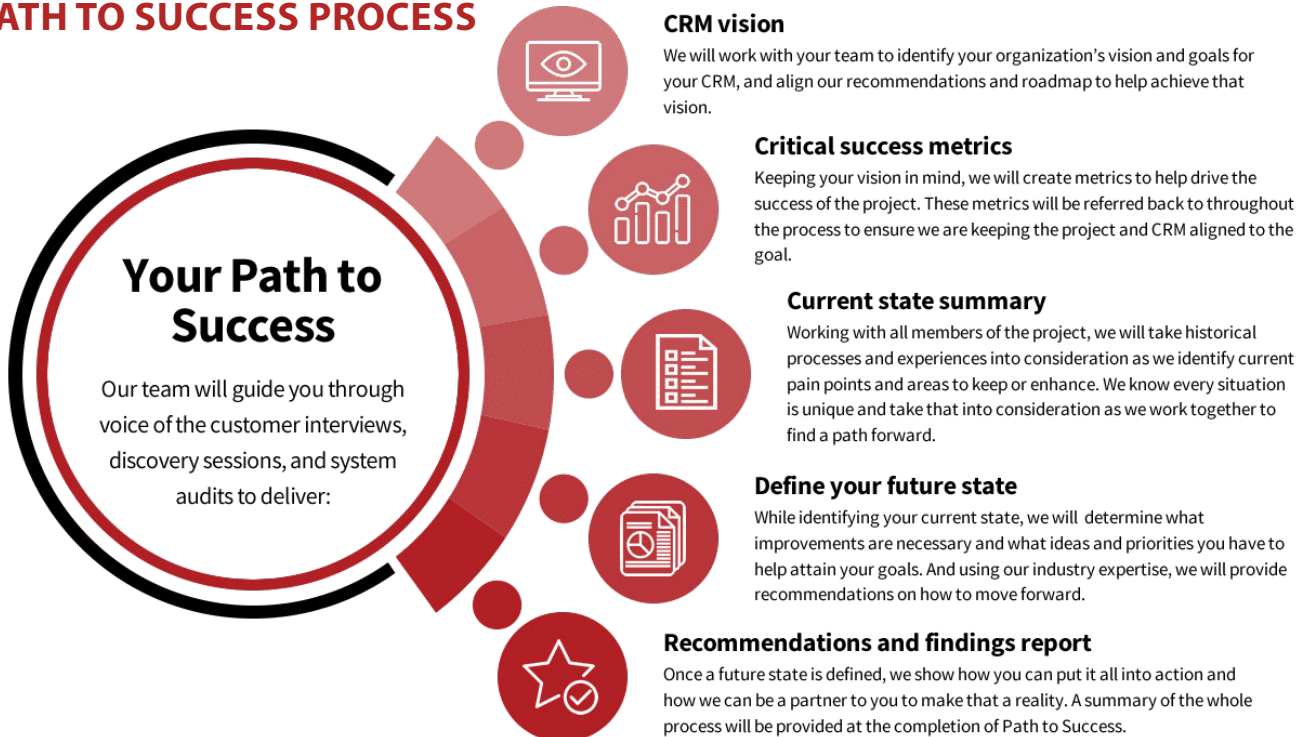

RAA has also reduced their customer support ticket resolution time by 15%, and is able to take advantage of more sophisticated revenue forecasting through Salesforce's reports and dashboards.

Switching to Salesforce has allowed RAA to streamline its data management, enhance communication with donors, clients and prospective partners, increase fundraising effectiveness, streamline support operations, and scale its impact on youth across the country.

"Redpath was absolutely integral to our project moving out of crisis and into effective change management. We would not have been able to move forward successfully as a team without their assistance. This included a little tough love that we sorely needed to come to terms with our current state...Every Redpath person I engaged with was professional, approachable, and extremely knowledgeable. A++ team and deliverables!!"

PATH TO SUCCESS PROCESS

At the end of a 6-week Path to Success, your team will receive:

- A recommended Salesforce implementation and/or enhancement roadmap
- An evaluation and recommendation for products or apps to implement (if applicable)
- An estimate and timeline for implementing the recommended roadmap

Need help choosing the right solution for you?
